Re-addressing patient conditions every calendar year

Hold a face-to-face office visit to confirm or deny your patient's condition(s) via the Clinical Documentation Improvement (CDI) Alert.

DON'T FORGET

01 Check CDI Alerts

Review your list of patients with historic or suspected diagnosis gaps per the CDI Alert.

02 Schedule an office visit

Schedule office visits with your patients before the end of the calendar year even if you're not actively treating the listed condition appearing on CDI Alerts.

03 Follow M.E.A.T. guidelines

Conduct office visits with your patients following M.E.A.T. (manage, evaluate, assess or treat) guidelines to address the condition(s).

04 Close gaps

Document your patient's condition in their medical record and confirm or deny the diagnosis gap on the CDI Alert.

The CDI Alert **must** be completed at the time of the patient visit with all diagnoses checked Yes or No. Historical and suspected gaps closed will count toward the incentive program enrolled in. When responding to the CDI Alert, exercise your professional, independent judgment. The fact that a question is asked doesn't imply that any particular answer is desired or expected. The CDI Alert objective is to support the goal of accurate and CMS-compliant documentation.
